

# RAFFI-el Workshop 2025

**10 SEP | Full day**

University of Naples  
Parthenope, Naples, Italy

Co-located with the  
17<sup>th</sup> International  
Conference on Social  
Robotics + AI

## Robotics and Arts for the Future of the Food Industry (RAFFI-el)

The RAFFI-el Workshop explores how robotics, AI, wearable technologies and the arts can collectively reimagine the future of food systems. By bridging technology and creativity, the workshop investigates innovative and ethical approaches to food production, distribution, and consumption — fostering sustainable practices, enhancing human and planetary well-being, and enriching culinary experiences. Bringing together experts from robotics, artificial intelligence, food science, and the arts, RAFFI-el offers a platform for interdisciplinary dialogue on topics such as robotic farming, AI-driven food design, wearable tech for chefs, and interactive dining. The workshop invites visionary ideas that challenge conventional boundaries and shape a more inclusive, artistic, and technologically advanced food future.

### Keynote speaker

Prof. Marita Canina, Polytechnic University of Milan

### Organisers

Francesco Semeraro, The University of Manchester

Tatiana Efremenko, Polytechnic University of Milan

Kosta Jovanović, University of Belgrade

Petia Radeva, University of Barcelona

Angelo Cangelosi, The University of Manchester
